

## Returning Art & Spirit to Medicine

Thank you for your interest in the Acutonics® Certification Program. This comprehensive curriculum draws on our direct experience as educators and practitioners, and a deep personal commitment to reawaken the healing connections that bring art and spirit back to medicine. Scientific rigor, research, and more than 15 years of documented clinical experiences, shaped the development of this modality. Acutonic® is being practiced in hospitals, clinics, private practices, and agriculture to benefit people, animals, and sustainable farming.

Each class builds on the earlier teachings to deepen your understanding of the cycles of nature and the profound universal connections between the natural world, body, mind, and spirit, and the role that they each play in our journey toward wholeness. As you learn to incorporate precision calibrated tuning forks into your clinical work you will also be exploring the network of interconnectivity that is at the heart and soul of many healing traditions, including Oriental Medicine, which is foundational to Acutonics. You will be joining a vibrant community of practitioners, teachers, students and clients that have helped the Acutonics system evolve and are active participants in the intentional use of sound and music to promote optimal health.

Currently more than 50 teachers offer classes around the globe and we are a continuing education provider for practitioners of Oriental Medicine and Massage and Bodywork. From the very first class you will gain valuable techniques that can be integrated immediately into your work. To find a class in your area or to learn more about the Acutonics system visit our website or call the office and we would be happy to answer your questions.

In harmony,

### The Acutonics® Certification Program

The Acutonics Certification Program is designed to address the diverse training needs of allied health professionals by providing a practical understanding of Harmonic Medicine, Oriental Medicine, and Sound Healing. Among our current students, you will find acupuncturists and Oriental bodywork practitioners, massage practitioners, nurses, doctors, naturopaths, chiropractors, physical therapists, psychotherapists, veterinarians, musicians, and energy healers. The unique curriculum is designed to expand the practitioner's knowledge and competency in the basic principles of Sound Healing and Oriental Medicine, while taking previous training into consideration. The core certification program is 380 hours, which includes 100 hours of clinical supervision, nine core courses, and two electives. All of the classes are two to four days in length. The majority of course work can be done on long weekends, and most people complete their training within three years.

#### Nine Required Core Courses:

- Level I: **Sound Gates to Meridian Harmonics**
- Level II: **Higher Harmonics and the Inner Nature of Tone**
- Level III: **Harmonic Attunement**
- Level IV: **Advanced Harmonic Applications**
- Level V: **Energetic Ethics**
- Level VI: **Case Studies: Clinical Documentaries**
- Level VII: **Harmonic Pathology**
- Level VIII: **Thesis Development and Presentation**
- Level IX: **Sedna: Super Conductor**

Each class builds on previous modules and there is extensive hands on experience. *Student Clinics* are a key element providing an opportunity to gain experience and demonstrate competency in the integration and application of Acutonics into clinical practice. Practitioners who cannot demonstrate proficiency through previous coursework must also complete *Theory and Energetics of Points and Meridians*. Students also select two electives. In the spirit of continuous learning, students and graduates contribute to website discussions, share treatment protocols, join mentorship groups, and take additional electives of interest.

#### Is Acutonics Right for Me?

Although the Acutonics® System draws heavily on the principals of Oriental Medicine, our comprehensive methodology is accessible to healthcare practitioners from many different backgrounds. Students explore the key concepts and inner traditions of Oriental Medicine, Energy Medicine, Astrological Medicine, Depth Psychology, and Sound Healing.

You will learn to work with a unique set of tools that deliver specific frequencies and create musical intervals tuned to the orbital properties of the Earth, Moon, Sun, and Planets. Students working together learn to apply these intervals directly on acupuncture and acupressure point combinations, as well as trigger points, chakras, and in the etheric field.

Each musical combination or interval that you learn to work with has its own unique energetic properties. You will also learn to work with essential oils and a variety of sound healing tools, including Tibetan Bowls and Tinchas, planetary gongs, chimes, bells, and drums.

All of our students share a desire to take their clinical work to a new level, and many feel blessed to connect with a group of like-minded practitioners working in diverse areas of health care. We are a continuous learning community, honoring diversity, and grounded in a spirit of mutual support and collaboration.
